

CVE FAQ 2021-22

1. Are we given/provided days for Covid related days we have to be out OR do I have to use my sick days?

Covid related days should be input into the sub system as "sick" days first. Then, after proof of a negative or positive Covid test reported to HR, they will change the status and return your sick days to you. This is an option through September, but it looks like it will be extended until December. Continue to check your sick leave balance often to confirm that this is done correctly.

2. If I have to call in sick to care for my own child due to symptoms/Covid related reasons, can I call HR to change these "sick" days into the "COVID" days?

See answer on question #1 (same protocol with being out for your own children)

3. If there is a positive case in my class, will I be asked to quarantine and/or will my whole class be asked to quarantine?

This will solely depend on if you are vaccinated and if you are in close contact. If you are vaccinated and in close contact, you will not have to quarantine. If you are unvaccinated and in close contact, you will have to quarantine. For your class, ONLY students that were in close contact with the positive case would be put in quarantine. This may not result in the whole class being in quarantine. Every situation will be determined case by case.

4. If a student tests positive, is put in quarantine, and they have a sibling in another classroom on campus, will their sibling need to quarantine as well?

As of right now, there is not a protocol for a sibling to have to quarantine unless they are showing symptoms or test positive as well.

5. Do I need to create work for my students who are in quarantine?

The district has created 3 packets for each grade level that accumulate to 6 weeks' worth of work. You can print those packets and have your students complete them during quarantine. You can also add your own work if you want to, but you are not required to. If your principal directs you to create additional packets, they must also provide you with the time to do that. The district packets can be found here:

6. Do I need to create sub plans in case I need to quarantine?

Some principals are asking teachers to prepare 2 weeks' worth of emergency sub plans to have just in case the teacher needs to quarantine. If your principal asks you for this, they should provide time for you to complete it. To make the process easier, work together in your grade level team and keep the sub plans simple.
